KEY BENEFITS

INTEGRATION DASHBOARD
- At-a-glance visibility of all your integrations in one place

ADVANCED MAPPING
- Use translations to automatically convert values between systems, including key values
- Control how and when each data field is updated
- Look up data from related records when needed

ERROR MANAGEMENT
- Easily identify integration errors and take appropriate action
- Quarantine errors allow unaffected records to integrate successfully
- Automatically retry and resolve errors

LIMITLESS CONNECTIONS
- Using pre-built data providers, easily connect and map Acumatica to other commercial systems
- Universal data providers allow for integrations with databases, files, and API standards like ODATA
- Build new data providers and easily integrate systems into Acumatica

DETAILED LOGGING
- Record and field-level auditing of any change that occurs on integrated records

Acumatica
The Cloud ERP

BIGCOMMERCE FEATURES AND CAPABILITIES

Health Dashboard	Ensure that your integrations are running optimally with real-time data and reporting through Acumatica dashboards. Easily identify and correct issues.
Advanced Mapping	Import/Export Scenarios are enhanced to provide additional features such as controlling how and when fields update (e.g. adding/updating records), tracking key fields and managing relationships between records.
Translations	Translate data between systems using translation tables. Lookup and merge related data onto records during import/export and use metadata to convert key values between systems automatically.
Error Quarantine	Records with errors are automatically quarantined to allow other records to continue to integrate without issue. Provides visibility into current issues without having to sift through integration logs.
Scheduling	Automation schedules are used to run integrations at desired times, including real-time integrations that run as often as every minute.
Automatic Retry	Errors can be automatically scheduled for retry and issues automatically resolve themselves once data integrates successfully between systems.
Record and Field-Level Auditing	Integrated records are automatically audited and logged at both the record and the field level so that at any time you can see exactly what actions were performed by your integrations.
Custom Data Providers	Custom data providers can be easily created to connect Acumatica to systems, including new commercial apps and homegrown systems.

Commercial Data Providers

THE ACUMATICA ERP DIFFERENCE

Acumatica delivers a full suite of integrated business management applications unlike any other ERP solution on the market today.

STREAMLINE OPERATIONS
Manage your business more efficiently:

- Automate processes
- Control workflows
- Access the system from anywhere on any device—including mobile
- Promote collaboration with all-inclusive user licensing

ADAPTABLE SOLUTION
Add and extend:

- Deploy in-house or in a private or public cloud
- Easily configure your solution to fit your needs
- Add capabilities such as CRM or data visualization at any time
- Extend to other solutions and applications beyond ERP

YOUR BUSINESS ACCELERATED
Get a single version of the truth:

- Accelerate business performance and make smarter decisions with automated processes, real-time data collection, financial analyses, and forecasting
- No per user pricing – system scales as your business grows
